Greater London, United Kingdom

### TECHNICAL SKILLS

---

- **Languages:** JavaScript, TypeScript, Python, Solidity, Bash, SQL, HTML, CSS, OpenAPI
- **Frameworks:** Next.js, Express.js, Hardhat
- **Technologies:** React.js, Redux Toolkit, Storybook, Node.js, MongoDB, Redis, MySQL
- **DevOps:** AWS, Git, Jest, GitHub Actions, Docker, Husky, ESLint
- **Other:** Scrum, TDD/BDD, Figma

### EXPERIENCE

---

#### Front End Engineer Intern

07/2022 – 10/2023

VIOOH (JCDecaux subsidiary) | *React.js, TS, Redux Toolkit, Jest, Storybook, TDD/BDD*

- Added the desired functionalities to the web UI which were given by the Product Owner
- Established and maintained a structured wiki for the team to motivate onboarding team members
- Collaborated with designers while creating stories using Storybook to improve the component development experience
- Migrated JS components to TS to boost robustness
- Wrote unit tests with Jest/React Testing Library to strengthen the confidence of the app

#### Blockchain Developer (Contractor)

03/2022 – 03/2023

Ajinomoto Turkiye | *JS, Jest, REST API, MVC, OpenAPI*

- Coded a REST API by following an MVC architectural pattern using the Express.js framework
- Introduced a coding standard using ESLint and Prettier to maintain a scalable codebase
- Composed user stories with clients and incorporated integration tests with Jest
- Documented the built API endpoints using OpenAPI Specification for future testing and improvements
- Asynchronously worked with two teams (the front end team and the SAP microservice team)

### EDUCATION

---

#### Durham University

09/2019 – 06/2022

*Bachelor of Science in Computer Science*

- **Modules:** Algorithms, Data Structures, Networks, Distributed Systems, Databases, UX Design and Cryptography
- **Dissertation:** Universally Accessible Order Book Style Decentralised Exchange ([paper](#))
- Former Course Representative

### PROJECTS

---

#### Transfer Coins([project](#)) | *React.js, Storybook, Figma, Tailwind CSS, PostgreSQL, Husky*

01/2023 – present

- Designed home, authentication and dashboard pages using Figma([figma](#))
- Coded the components using React.js, Next.js and Tailwind CSS, while isolating them with Storybook([storybook](#))
- Enhanced the deployment success rate from 80% to 100% by integrating tests using Husky into Git hooks
- Currently, modelling the database schema based on the requirements specification

#### Decentralised Exchange([project](#)) (Bachelor's Project) | *JS, Solidity, Ethereum, Hardhat, Mocha*

12/2021 – 05/2022

- Designed, coded, and hosted a central limit order book style decentralised exchange where all data is saved on-chain
- Designed a single-page website using Figma and turned it into code with HTML, CSS, and JavaScript
- Coded the business logic in Solidity and deployed the smart contracts on Ethereum Virtual Machines
- Developed 14 integration tests using Mocha with Hardhat to test order book scenarios

#### Algorithmic Trading Bot([project](#)) | *JS, Cloud instance*

08/2021 – 01/2022

- Developed a JavaScript algorithmic trader that generated a profit of 13% with £15,000 by implementing a given strategy
- Achieved a 200% increase in the success rate of our strategy by renting a dedicated server to host our EVM full node

### ADDITIONAL SKILLS & INTERESTS

---

#### Community Manager

02/2021 – 03/2022

- Saved 1 person-hour per day while scaling a group from 750 to 4,000 members by utilising and building chatbots for our Telegram, Twitch, and Discord groups
